What's New In?

The app provides a simplified UI for instant cleaning of your PC. Summary The current incarnation of System Refixer makes for a very simple and straightforward software to use. Its graphical design is also very intuitive, and thus, it won't require much time to learn how to use it. User interface One of the most impressive features of System Refixer is its streamlined interface, which will help the app to run very smoothly even on systems with relatively little RAM. Once installed and launched, the app will immediately start scanning, and will require just a couple of minutes to complete its work. Performance Like any other similar cleaning app, System Refixer offers a somewhat low-performance approach. However, it is good enough for the average user. Main functionality System Refixer includes some useful tools, but it is definitely not a full-fledged antivirus program. It will help you clear the clutter from your PC, but it won't be capable of providing you with all-round protection for your system. Some of its key features include: Complete system scan. Fast and hassle-free clean of the browser cache, temporary files and the caches of online services. Scan the registry to detect and repair common problems. Locate and remove invalid settings, programs, startup items, etc. Defragment your hard disk. Provide a simple and clutter-free experience with minimum system overhead. Supported OS platforms System Refixer should be available on any Windows system, and it is capable of running on both 32-bit and 64-bit systems. System Requirements System requirements are simple: the app should be able to run on a Windows system which was installed with a Windows 7 / Vista / XP / 2000 / 98. It is also suggested that the RAM of the system should be around 512 MB or more, which will help to avoid interruptions. Best iOS and Android Cleaning Apps Top 10 Android Cleaning Apps Mobile phones are one of the most important devices for modern man. Any purchases and all important stuff, like photos or videos, are mostly stored on their memory. If you have a smart phone, cleaning apps are the key. But how to clean Android phone?
